DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Roever (20030007686) teaches a related method and computer readable medium for converting between color space formats comprising determining when to apply offset parameter and scale parameter in relation to application of the conversion matrix. (p. 2 paragraphs 24-25, Fig. 1) However no prior art references anticipate or suggest the limitations of **"determining when to apply the offset parameter and scale parameter either before or after application of the conversion matrix"** in combination with other claim limitations in independent claims 1 and 9. It should be noted that in light of applicant's disclosure (p.3 paragraph 8, p.11 paragraph 28, Tables 1-2) and applicant's Remarks (applicant's response p.3 dated 11/10/06), the limitation of "determining when to apply offset and scale parameters either before or after application of the conversion matrix" signifies "selecting whether to apply offset and scale parameters before or after application of the conversion matrix" and therefore is the interpretation taken by the examiner concerning said limitation. Claims 2-8, 10-14 and 28-30 depend on independent claims 1 and 9 and thus, are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
